

## A Survey of Mathematics with Applications (9th Edition)

In a Liberal Arts Math course, a common question students ask is, Why do I have to know this? A Survey of Mathematics with Applications continues to be a best-seller because it shows students how we use mathematics in our daily lives and why this is important. The Ninth Edition further emphasizes this with the addition of new Why This Is Important sections throughout the text. Real-life and up-to-date examples motivate the topics throughout, and a wide range of exercises help students to develop their problem-solving and critical thinking skills. Angel, Abbott, and Runde present the material in a way that is clear and accessible to non-math majors. The text includes a wide variety of math topics, with contents that are flexible for use in any one- or two-semester Liberal Arts Math course.

Note: This is a standalone book, if you want the book/access card please order the ISBN listed below:
