

Overcoming Racism and Sexism

This collection of new essays, by scholars from many different intellectual perspectives and ethnic backgrounds, explores practical as well as theoretical aspects of racism and sexism while probing the connections and differences between them. Practical aspects examined include racism and sexism in the women's movement, the hidden nature of privilege, and the challenges feminists face in the 21st century. Theoretical issues addressed include the viability of the very concept of race and the significance of concepts like whiteness, ethnicity, and gender identity.
