

Knowledge and Persuasion in Economics

Donald McCloskeys previous books, *The Rhetoric of Economics* and *If Youre So Smart*, aimed to bring economics back into the wider conversation of the day. In *Knowledge and Persuasion in Economics* he carries the conversation further, into the seminars of philosophers. His message is that economics is a science, but a human science. It is properly mathematical, but literary too. His book is highly unusual: a work of technical economics that can be read by anyone, a witty guide to the ins and outs of economic philosophy expressed in plain English.
