

Non-Poisonous Radiation: The difference between medicine and poison is dosage plus intention.

Non-Poisonous Radiation: The difference between medicine and poison is dosage plus intention.

Writing letters of love to sounds, people and the feeling of loss. I carry a knowingness that is experienced through words. Sometimes, when we hear about one persons love for another, we create comparisons. Go for it. Wonder about your love through me. Truth loves to be questioned and compassion loves to be felt. May your mind float within the ether of reading. Listen while you breathe, and remind me when and where to bring you. This book is about finding your destination, and believing that you have arrived.
