

Teen Health Course 1 Student Edition

Teen Health is the integrated, activities-based health program written especially for middle school students. This sequential, three-course program provides the perfect combination of course material and interactive multimedia resources. Teen Health helps students understand that good health affects their school performance, their friendships, their looks, and their lives. In middle school, life changes quickly. There's more freedom and more peer pressure. Students might be faced with life-changing decisions when they least expect it. That's one reason why mastering good health skills is so essential during the teen years. Teen Health stretches far beyond traditional health topics to cover the subjects your students really want to know about. It explains the importance of avoiding risky behaviors and provides step-by-step guidelines on how to do so. Course 1 Student Modules: Adolescence: Growing and Changing Building Character Conflict Resolution
