

Barth (Outstanding Christian Thinkers (Hardcover Continuum))

Karl Barth (1886-1968) has been called the most important Protestant theologian since Schleiermacher. A lifetime of work produced a complex body of writings that emerged both from his theological teaching and from his engagement in church life. The publication of some of his work posthumously has invited fresh and attentive interpretations of his thought. This book draws together these readings to provide an introduction to the main themes in Barths theology. It shows the continuity and coherence of Barths work, and stresses the importance of his biblical and ethical writings alongside his systematic theology. The book opens with a study of Barths ethical thinking in key writings from the period of his break with theological liberalism. It then goes on to highlight the moral anthropology set out in his lectures on ethics from the end of the 1920s. Webster studies the themes of original sin, hope and freedom in Barths Church Dogmatics, illustrating Barths concern to prove that divine grace shapes and restores human agency. He also explores the theme of missionary activity of the church in relation to Barths remarkable treatment of the prophetic office of Christ, and draws a contrast between the moral anthropology of Bart and Luther. In conclusion, he focuses on Barths response to modernity, postmodernity and the tasks of theology.
